

Semester Project for MM 205

Your task is to create a web site that shows off your portfolio.

Requirements/Deliverables

- At least 3 sample sketches of the look and feel of the home page and the portfolio page
- A site map illustrating the organization of the web site, to be made in Illustrator
- Wireframes of your layout, to be made with Illustrator or Balsamiq
- A prototype/comp made in Photoshop that depicts the design of the web site. It must contain a logical naming system for folders and layers
- The web page itself must be live and viewable on the web.
- The web page must contain at least 5 html pages
- The web page must have at least 4 sections, one with a portfolio/gallery, another should contain your resume formatted with proper html tags.
- All links must work properly
- The site must contain original content
- The site must be visually appealing, ie text must be legible, layout must be well thought out
- Your site must take into account principles of usability
- An external css file must govern the design
- The site must be search-engine friendly
- A working form
- Your images MUST be optimized for web
- You must have proper root hierarchy
